

Beautification Board Yard of the Month August 2018

Congratulations to Mr. and Mrs. Wnek of 305 Glenwood Avenue. They received the YOM Landscape Award for August. The variety and combination of plants is beautiful. The many native plants and lack of turf in their yard are a great example of environmentally friendly landscaping. Their selection of flowering bushes and groundcovers, along with seagrapes provide food for birds and butterflies. Decreased need for irrigation and fertilization is important for a healthy environment.
