

Brush Burns at Pelican Coast

During November and December, the Satellite Beach Fire Department and the Florida Division of Forestry have coordinated with Franklin Excavation to schedule burning vegetative materials as part of the overall project of demolishing the remainder homes located in the old South Patrick Housing area.

The burning process includes forced air incineration, which means there will be little to no smoke from the fire once the process starts. The burning will only take place between the hours of 9:00 a.m. and 5:00 p.m. and only after receiving permission, daily, from the Division of Forestry who will review wind conditions and other influencing factors.

If you have any questions or concerns, please contact Satellite Beach Fire Department at 773-4405.
